

## Kurzweil 3000 Volume Purchasing

Kurzweil 3000 has many options – Professional Color licenses, Professional Black and White licenses, Learn Station licenses and USB licenses. This flyer is designed to help you sort them out when making decisions to best meet the needs of your school.

Schools typically purchase combinations of Professional and Learn Station licenses. The difference between the two is that the Professional License works with a flatbed scanner to take a picture of a document and bring it into Kurzweil 3000 where it can be read aloud and used with all the Kurzweil tools. Learn Stations provide all tools except the scanning feature. This provides additional student access without requiring that all computers be equipped with a scanner. The USB License gives students and teachers immediate access to Kurzweil 3000 on any Windows computer without installing any software. Please call LAB Resources for USB pricing or check out our catalog.

We have found that a good ratio of Learn Stations to Professional licenses for a school is 80/20 – 80% Learn Station and 20% Professional Color.

Listed below are our Volume Pricing Packs for both stand alone and network licenses. All of our Volume Packs are 80% Learn Stations and 20% Professional Color - CD Version.
