Introducing ... iPod Training Videos

New! From LAB Resources!

New this fall, LAB Resources will be offering iPod Training Videos to augment our LAB Lessons tutorials.

These iPod videos are designed for the educator who would like a demonstration to go along with the tutorial. Or, they can be used to get new staff up and running with a software program. For example, may have missed a workshop in which

others learned how to use a software program. The iPod Video will provide this training.

The iPod training Videos provide a narrated PowerPoint presentation and software demonstration, and will run on iPod or MP3 players capable of playing MP4 video. They are bundled with our LAB Lessons tutorial and link to the tutorial for hands-on

practice after each lesson is presented.

Here is a list of titles:

- Boardmaker for Windows Ver. 6
- Clicker 5 - Windows
- Dragon Naturally Speaking 9
- IntelliTools Classroom Suite 3.2 and 4
- Kurzweil 3000 Ver. 10
- WYNN Wizard/Reader 5.1

New! Handheld Solutions from AbleLink Technologies

Handheld devices are popular in mainstream use. With AbleLink software, handheld devices can be adapted to remind individuals with cognitive disabilities of daily appointments and tasks. These PDAs can

also be programmed to provide time-based prompts and to provided step-by-step instructions for vocational, educational or daily living tasks.

Handheld solutions from AbleLink use standard

PDA hardware—so individuals who use them are using the same popular devices other adults are using.

The AbleLink software for handheld devices can be purchased bundled with a

Dragon Corner

This regular column answers a commonly asked question about Dragon NaturallySpeaking

Question: When used in a school, is Dragon NaturallySpeaking licensed per student or per computer?

Answer: This is a question that comes up frequently. Part of the confusion is that all for all other organizations, Dragon NaturallySpeaking is licensed per user. However, Nuance, the manufacturer of Dragon NaturallySpeaking, has made an exception for schools and allows schools to have more than one user per computer.

When you put the CD in the drive to install Dragon NaturallySpeaking, you are asked to accept the license agreement. Section 1 (b) of this license agreement addresses this issue:

1(b). Grant of License (Educational Institutions Only).

Nuance grants a non-exclusive license, without the right to sublicense or otherwise transfer, to Licensee to install and use one copy of the Software contained on the provided installation media on a single computer running a validly-licensed operating system and to use, in connection with such Software, the rest of the Software Package. Licensee is permitted to create and use multiple User Profiles under this License. A single license for the Software Package does not allow Licensee to use the Software Package on a server. This license for the Software Package does not allow Licensee to use the Software as a run-time engine.

The key phrase in the above paragraph is: "Licensee is permitted to create and use multiple User Profiles under this License." Therefore, you can create voice files (user profiles) for multiple students with a single copy of Dragon NaturallySpeaking installed on one computer. Again, this is only for educational institutions.

If you would like to have Dragon NaturallySpeaking available on multiple computers, the Open License Program is the most economical solution. Please call LAB Resources for pricing and more information.

LAB Resources is an authorized Value Added Reseller for Dragon NaturallySpeaking. We provide training, support and have created our own tutorials and training materials. Please call LAB Resources for more information (262-691-3476 or 800-691-3476).

Handheld Solutions ... continued from page 1

PDA or you can put it on any PDA which is capable of running Windows Mobile 5.0.

Here is a description of the individual software programs from AbleLink.

The **Pocket Discovery Desktop** software provides a simplified interface for accessing a PDA.

The **Schedule Assistant** software lets you set up a schedule with appointments, medication, and

reminders. Schedules can include a relevant picture or icon. Time-based audio cues can alert the user to an appointment or task that needs to be done.

AbleLink also makes software that provides cues for completing tasks. These tasks may be vocational, educational or daily living tasks.

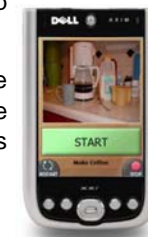

- **Pocket Coach** is designed for the individual who needs verbal prompts to complete a task, but not a picture cue, to complete a series of personalized step-by-step instructions.

- **Visual Assistant** works like Pocket Coach, with the addition of including pictures with each step.

- **Pocket Compass** is AbleLink's most powerful handheld prompting system. It includes time-based prompts in addition to step-by-step instructions with verbal prompts and pictures.

These software programs are available individually or in a bundle, and with or without a PDA.

For more information and pricing, contact LAB Resources at 262-691-3476 or 800-691-3476

iPod Videos ... continued from page 1

We will be rolling these videos out this fall, with the first 2 titles scheduled to be released in October: Boardmaker 6 and Dragon NaturallySpeaking 9.

Our iPod videos can be added to our Workshop in a Box, allowing individuals who missed a workshop to learn the information that was

presented.

For more information about Workshop in a Box, please call LAB Resources at 262-691-3476 or 800-691-3476 — or visit our website www.elabresources.com
